INTRODUCTION

In the Master's Degree paths it is possible to customize the Study Plan, indicating preferences for certain Laboratories/Studios (if provided in the Manifesto), workshops and elective teachings.

The elective courses are part of the compulsory teaching offerings to reach the CFUs required to graduate; they allow to customize the Study Plan by delving into topics of your interest.
They have a "weight" of 6 cfu each and like the other teachings provide for the assignment of a grade.

At the end of the submission of the Study Plan, the School will check the options and proceed with the acceptance of preferences based on a merit ranking (weighted average as of July 31 for those enrolled in the 2nd year; grade assigned by the Access Committee for newly admitted) up to the maximum number of available places.

INTRODUCTION

How many to chose?

You must enter one teaching for each Group activated by the Master's Degree Course in the Plan.

How to chose?

Before choosing them, check: programs, pre-requisites, semester and language of delivery published on the Online Manifesto.

Check the schedule and available spots posted on this page of the website. Since these are teachings offered to multiple Courses of Study, it is possible that not all of them may be compatible with the schedule of other curricular teachings.

How to select them?

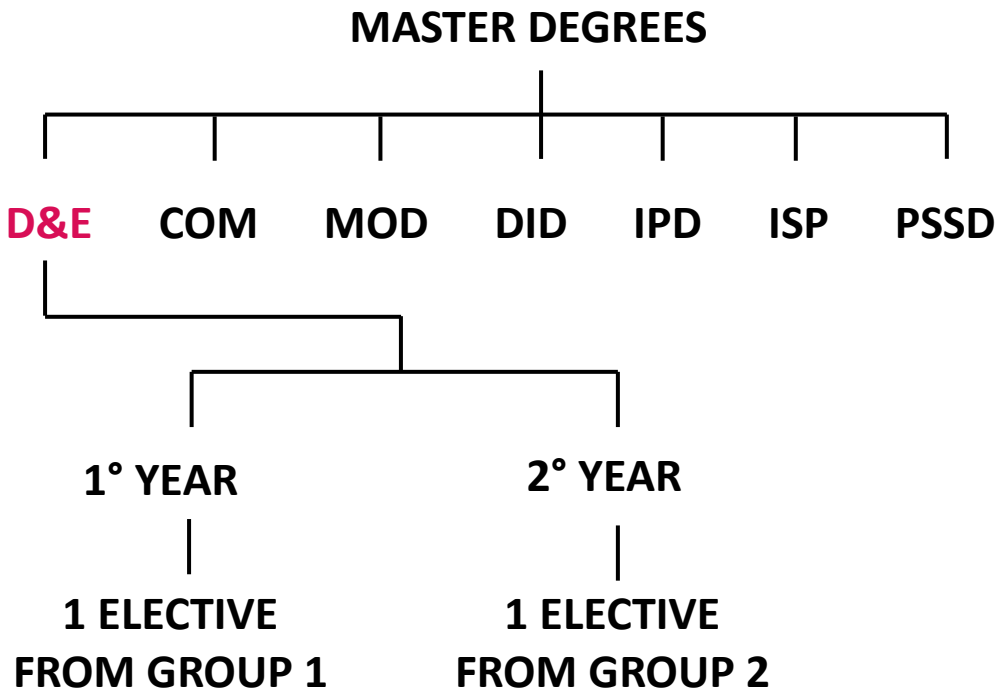
When submitting the Study Plan for each Group you will be asked to express 8 options in order of priority.

The School will verify the options and proceed with the acceptance of preferences on the basis of a merit list up to the maximum number of available places.

If you will be participating in an international mobility program and if you include elective courses in your learning agreement, remember to select **"Erasmus experience"** as the first option.

ELECTIVES SCHEME

Design & Engineering



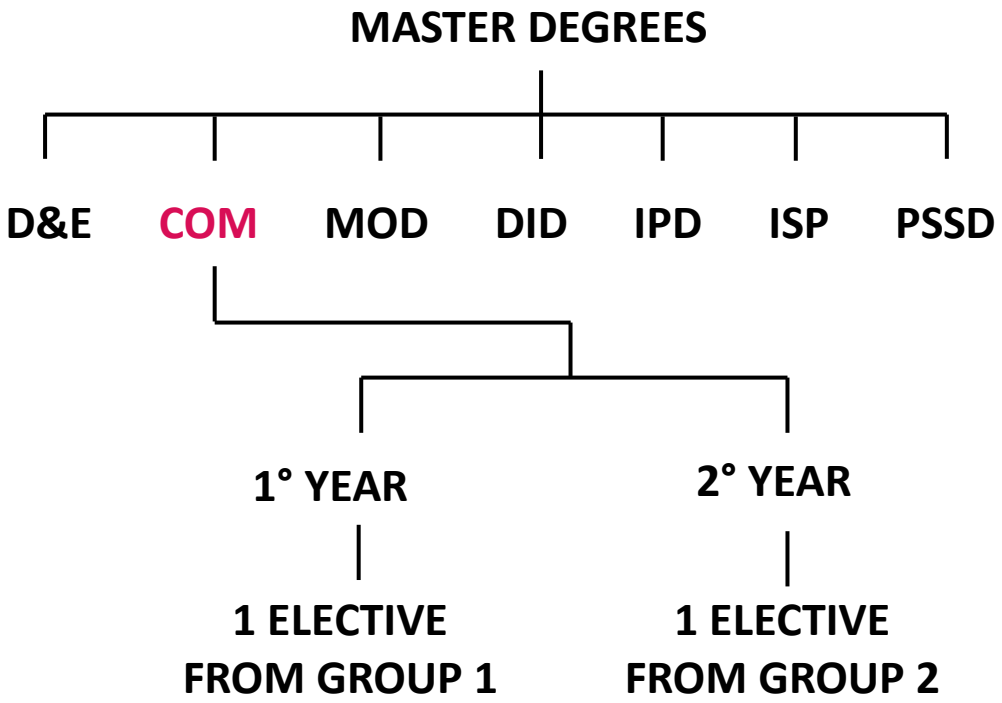
Remember

You must enter one teaching from each Group in the Plan.
You cannot enter two or more teachings from the same Group or supernumerary elective courses.

The offer can be seen at this link.

ELECTIVES SCHEME

Design della comunicazione



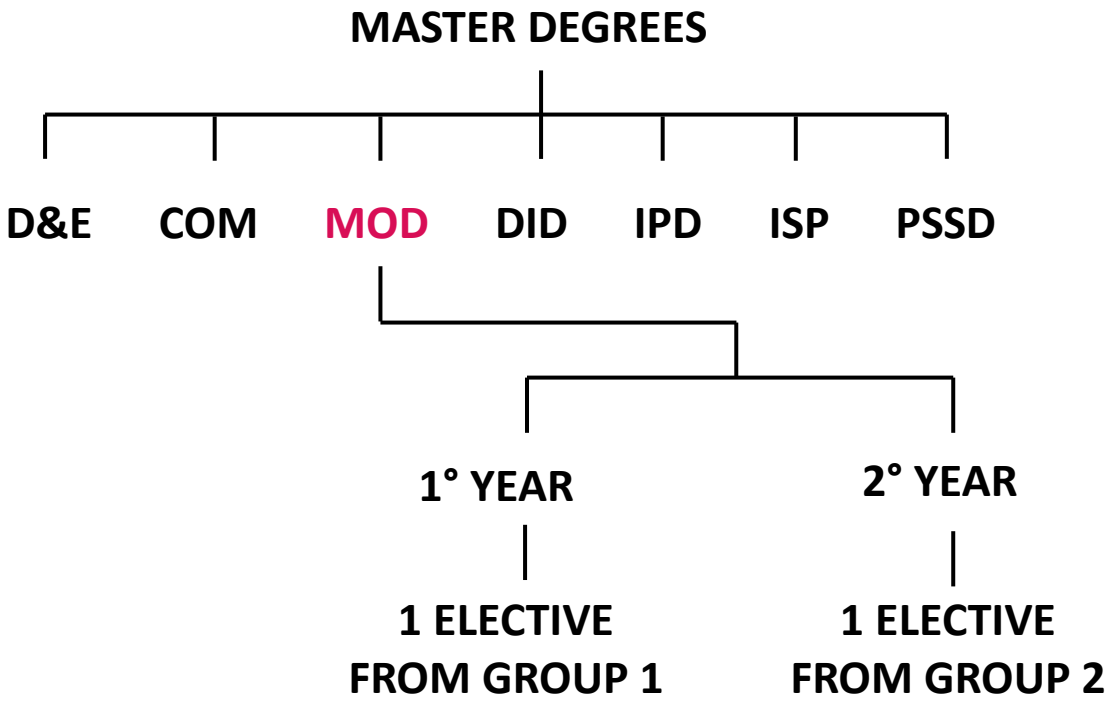
Remember

You must enter one teaching from each Group in the Plan.

The offer can be seen at this link.

ELECTIVES SCHEME

Design for the Fashion System



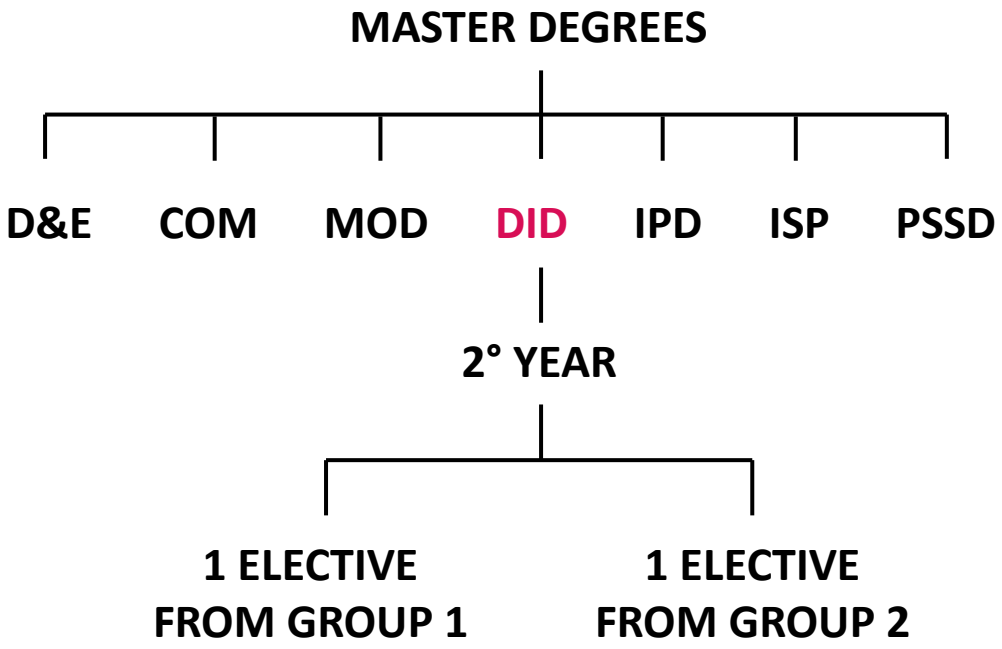
Remember

You must enter one teaching from each Group in the Plan.

The offer can be seen at this link.

ELECTIVES SCHEME

Digital and Interaction Design



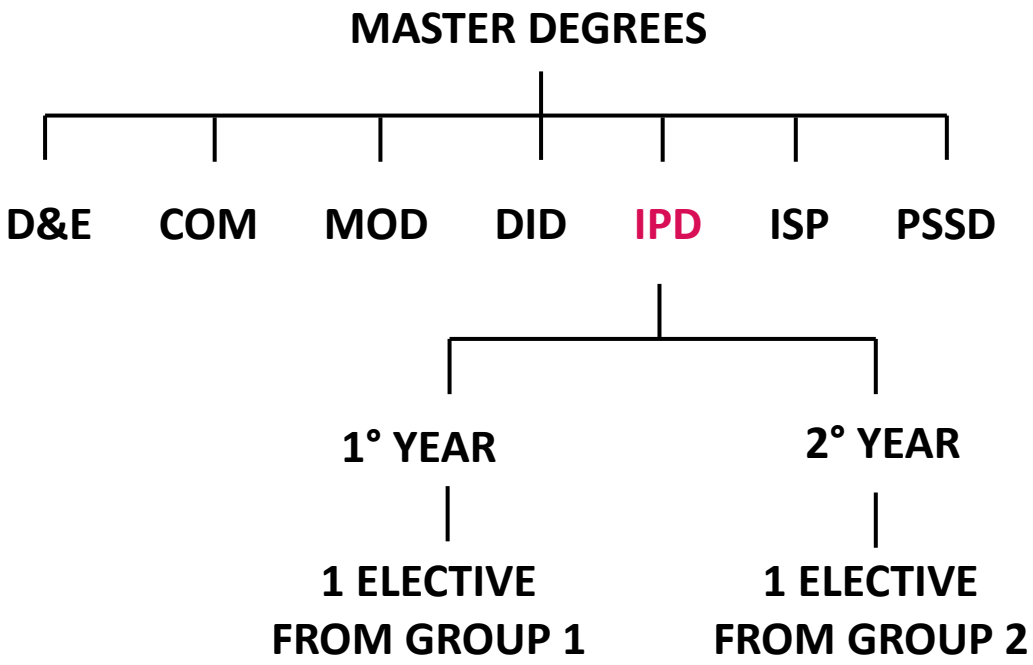
Remember

You must enter one teaching from each Group in the Plan.
You must express 5 options for Group 1 and 5 options for Group 2 (different options from each other).

The offer can be seen at this link.

ELECTIVES SCHEME

Integrated Product Design



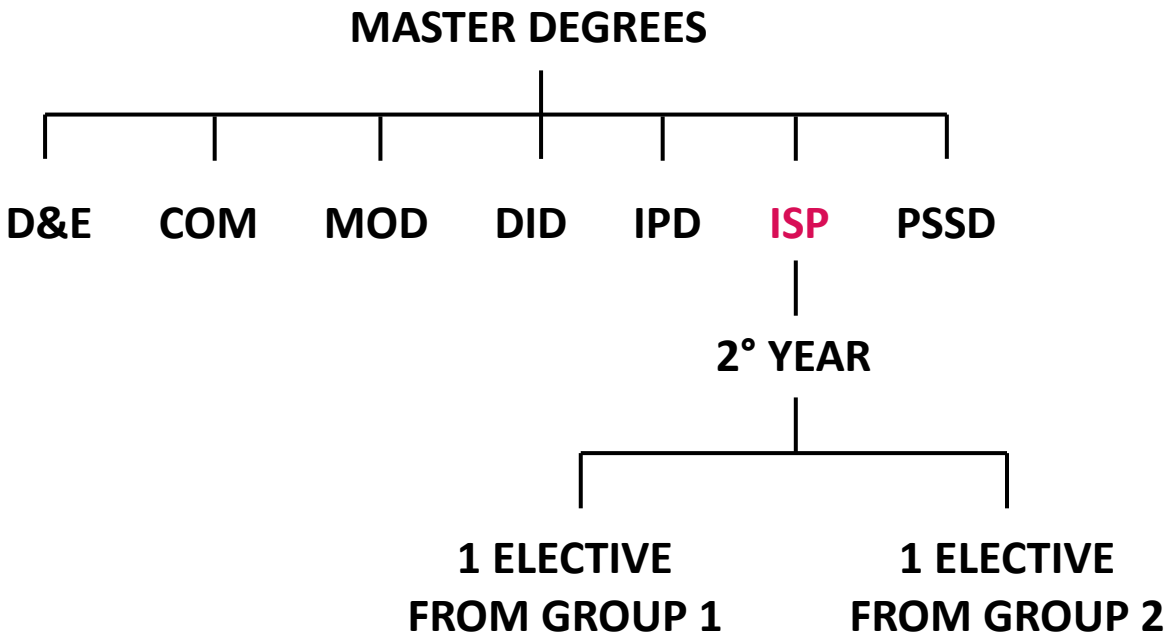
Remember

You must enter one teaching from each Group in the Plan.

The offer can be seen at this link.

SCHEMA CORSI

Interior and Spatial Design



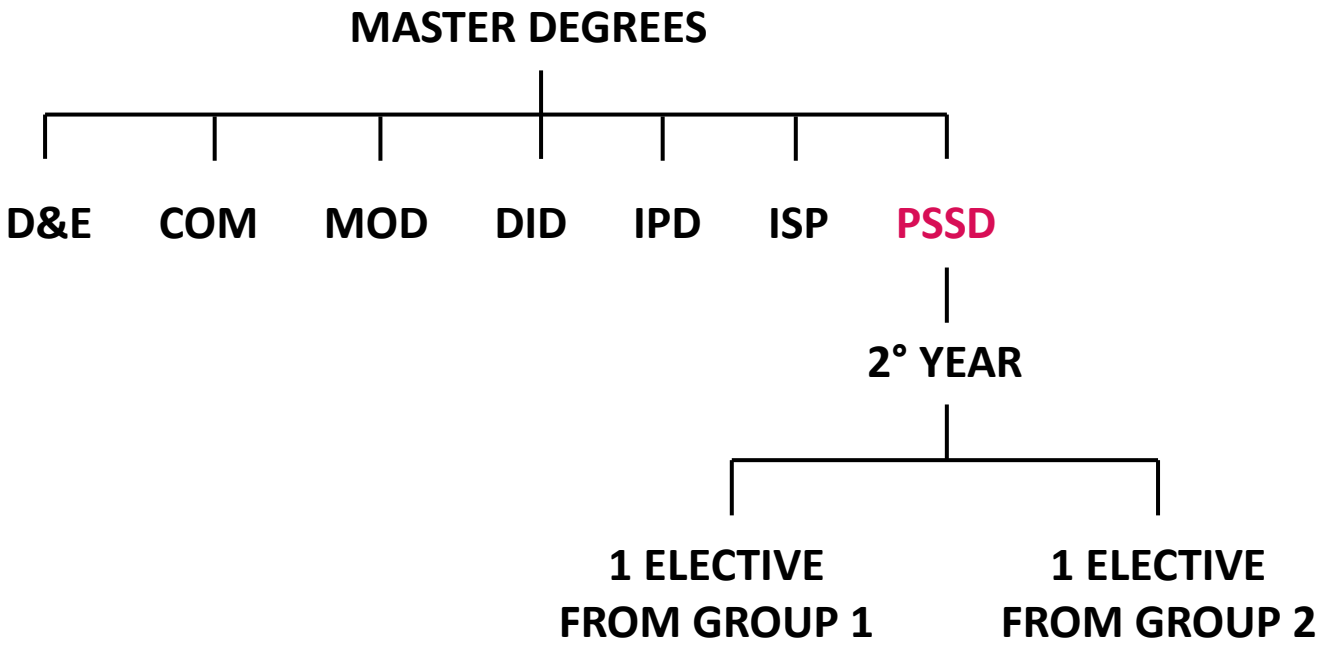
Remember

You must enter one teaching from each Group in the Plan.
You must express 5 options for Group 1 and 5 options for Group 2 (different options from each other).

The offer can be seen at this link.

ELECTIVES SCHEME

Product Service System Design



Remember

You must enter one teaching from each Group in the Plan.
You must express 5 options for Group 1 and 5 options for Group 2 (different options from each other).

The offer can be seen at this link.

ALLOCATION

Allocation is done by an automatic system that considers your weighted average. All decimals are considered without rounding.

Scheduled number is agreed with faculty: please do not ask for exceptions.

Following your allocation, there is a week in which you can request to change the courses in which you have been allocated: to do so, you must send an email in the "courses of your choice - workshops" section.

Notice of available places for course change requests is posted on the School of Design website once the allocation process is complete.

Applications are accepted on a first-come, first-served basis and consider the number of members present at that time.
